PROFILE

Motivated IT professional with strong attention to detail and practical experience in technical support, network management, and IT systems operations. Experienced in working with Windows, macOS, and Linux environments, as well as software installation, system configuration, troubleshooting, network maintenance, and user support. Skilled in analyzing and resolving hardware, software, and network issues to ensure stable and efficient IT operations. Strong knowledge of Microsoft Office, IT support processes, and basic cybersecurity practices. Also possesses foundational knowledge of Artificial Intelligence and Data Science. Works in a structured and solution-oriented manner, with excellent communication skills, a collaborative mindset, and a strong willingness to learn and develop professionally.

EDUCATION

● M.Sc. in Computer & Systems Engineering: Technische Universität Ilmenau	2026 - 2028
● Bachelor of Computer Application: Guru Nanak Dev University, Punjab	(7.59 / 10 GPA) 2020 - 2023
● Certificate in Artificial Intelligence and Data Science	(6.5/10) 2022 - 2023
● PSEB 12 th :SSSS Khalsa Sr. Sec. School, Amritsar	(70%) 2018 - 2019

EXPERIENCE

Cyberbells ITES — Technical Support Executive / Network Technician	04/2024 - 11/2025
- Provided technical support for Windows, macOS, and Linux systems, including installation, configuration, software updates, and troubleshooting. - Managed software installations, licensing, and performance optimization to ensure stable and efficient IT systems. - Maintained and monitored network components, including routers, switches, LAN/WAN networks, and Wi-Fi infrastructure. - Analyzed and resolved hardware, software, and network issues to minimize system downtime and ensure smooth operations. - Provided user support for technical issues and helped ensure smooth day-to-day IT operations. - Implemented basic security measures for systems and networks with a focus on stability and data security.	
Teleperformance Global Business Pvt. Ltd. — Customer Service Representative	09/2022 - 02/2024
- Handled customer inquiries via phone, email, and chat while maintaining a strong focus on customer satisfaction. - Provided accurate information about products, services, and company policies. - Assisted customers with technical and service-related issues through effective and solution-oriented communication. - Documented and tracked customer inquiries to support process improvements and enhance service quality. - Developed strong communication, problem-solving, and multitasking skills while working in a dynamic environment.	

PROJECTS

Solving the N-Queens Problem using Optimization Algorithms

- Implemented multiple algorithms to solve the N-Queens problem (DFS, greedy hill climbing, simulated annealing, genetic algorithm)
- Compared performance based on execution time, memory usage, conflicts, and scalability (up to N=500)
- Built benchmarking and visualization tools using Python
- Technologies:** Python, NumPy, Pandas, Matplotlib

Secure Messaging System Using Encryption Techniques

- Developed a secure messaging web application using Flask and Python Cryptography library
- Implemented user registration, login, and encrypted message exchange
- Added security logging and attack simulation features for testing
- Technologies:** Python, Flask, Cryptography, HTML/CSS, JSON

Road Damage Detection Using Convolutional Neural Networks

- Built a deep learning model to classify road damage images into pothole, crack, and manhole
- Used custom CNN and MobileNetV2 transfer learning for comparison
- Achieved 63.93% accuracy with custom CNN model
- Evaluated results using confusion matrix and performance metrics
- Developed a local web app for image prediction (deployment pending)
- Technologies:** Python, TensorFlow/Keras, OpenCV, NumPy, Matplotlib, Flask

NeuroRevive 360 | Web Application

- Built a full-stack Next.js web application with SSR and SEO optimization
- Improved performance by ~35% using code splitting and lazy loading
- Designed MongoDB database with 6+ collections, indexing, and RBAC system
- Created responsive UI using Tailwind CSS with good accessibility (WCAG compliant)
- Live demo: <https://neuro-revive360.vercel.app>
- **Technologies:** Next.js, MongoDB, Tailwind CSS, Node.js

3DES Encryption System (Ongoing Project)

- Developing a Python-based file encryption and decryption system using 3DES
- Supports encryption for multiple file types (TXT, PDF, DOCX, images)
- Includes GUI using Tkinter with key generation and file handling features
- Planning testing, error handling, and executable build using PyInstaller
- **Technologies:** Python, PyCryptodome, Tkinter

SKILLS

- **Frontend:** TypeScript, JavaScript (ES6+), React.js, Next.js, Vue.js, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, RESTful API, GraphQL, JWT (JSON Web Token), RBAC (Role-Based Access Control), Middleware, MVC, OOP, Microservices (Basic knowledge)
- **Databases:** MongoDB, PostgreSQL, MySQL, SQL, NoSQL, database design, indexing, aggregation pipelines
- **Operating Systems:** Windows, Linux, macOS
- **Networking:** LAN/WAN, Router, Switches, Wi-Fi, Network Troubleshooting
- **IT Support:** Technical Support, User Support, Software Installation, System Configuration, Troubleshooting
- **Tools:** Microsoft Office, Excel, Word, Documentation, Reporting
- **Soft Skills:** Communication, Problem Solving, Teamwork, Time Management, Customer Support

LANGUAGES

- **Deutsch:** A1 (actively improving)
- **Englisch:** C1 (Fluent)
